

PowerBox

Portable power station
Moduloo Ex range

Quick start guide

User interface

PowerBox

- 1 Emergency stop button
- 2 Solar input
120 - 500 VDC / 18 A
- 3 ON / OFF button
- 4 AC charge outlet
220 VAC / 16 A / 50 Hz
- 5 Signal connector
- 6 LED displays
Battery state of charge
- 7 Breaker box
- 8 Power outlets
220 VAC / 16 A / 50 Hz / 3.5 kW max
- 9 Ethernet connectors
- 10 Power connector n°1
220 VAC / 50 A / 50 Hz / 11 kW max
- 11 Power connector n°2
220 VAC / 50 A / 50 Hz / 11 kW max
- 12 Wheels with 2 swivel braked wheels

Telescopic handle

All-terrain wheels

Electrical specifications

PowerBox	E5	E11
Available energy /kWh	5.5	11
5 kW DC / AC single-phase converter	1	2
Output power /VAC	220	220
Frequency /Hz	50	50
16 A output	4	4
Maximum continuous discharge power /kW	3.5	3.5
50 A output	2	2
Maximum continuous discharge power /kW	5.5	11
Recommended charge time /hours	5	5

Power outlet	E5	E11
Input power /VAC	220	220
Maximum continuous charge power /kW	3	3
Maximum continuous charge current /A	16	16

Solar recharge	E5	E11
Input power /VDC	120 - 500	120 - 500
Maximum continuous charge power /kW	5.5	5.5
Maximum continuous charge current /A	18	18

Mechanical specifications

Dimensions

962 x 650 x
590 mm

Weight

70 kg (E5)
110 kg (E11)

Sealing

IP54

Temperature

Operating
- 10 to + 40 °C
Charge
0 to 40 °C

Chemistry

Li-ion NMC

Outer case

Aluminium

Package content

Included in delivery

Portable power station
PowerBox

Outlet power cable
220 VAC 16 A

32 or 63 A 220 VAC adapter

Quick start guide

Optional accessories

Obtain additional accessories for your PowerBox by contacting TYVA Energie:

Starting up

1

Control before use

1. Make sure the emergency stop button is disarmed.
2. Put every switches of the breaker box on the position ON.
3. Adjust brakes according to your needs.
4. Keep the charge cable nearby.

2

Power up / down

1. Press the ON / OFF button once.
2. The indicator light on the button and both LED displays are blinking twice to indicate the system's switching on. They stay lit once the PowerBox is ready for use.
3. Press once more to switch off the station. Make sure not to store it while discharged.

3

Use

1. Take the suitable adapter among the accessories included in delivery.
2. For a current lower or equal to 16 A, connect the cable to the PowerBox on one of the four plugs ① provided for this purpose. For a current higher than 16 A, connect on one of the two plugs ② dedicated. Finally, plug the opposite end to your application.
3. You are now powering your application thanks to the PowerBox and you can use it as you wish.
4. Unplug the cable and switch off the PowerBox to end the use.

The PowerBox can only be used in a - 10 °C to + 40 °C temperature range. It follows a specific security protocol that cannot be bent outside this range.

Charge is impossible if you exceed the 0 to + 45 °C temperature range.

Discharge is impossible if you exceed the - 20 °C to + 60 °C temperature range.

ON / OFF

TYVA Smart Dashboard

Download

Download our TYVA Smart Dashboard monitoring app, the genuine mobile dashboard available on Android and iOS smartphones and tablets, then connect yourself to the system with Bluetooth!

Android devices

Download the app via the Google Play Store

iOS devices

Download the app via the App Store

By downloading the TYVA Smart Dashboard app, you accept the terms and conditions of TYVA Energie's Privacy policy. Learn more: <https://tyva-energie.com/en/privacy-policy/>

Interface

The TYVA Smart Dashboard digital app allows you to supervise the global system of your portable power station made up of TYVA Energie's lithium batteries. It includes four tabs:

Homepage

Global overview of information

Properties

Temperature and voltage data

Graphs

Temperature, power, voltage and current follow up

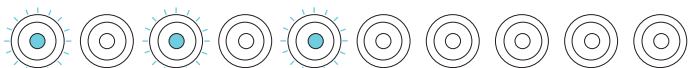

Alerts

Warnings (blue icon) and errors (orange icon)

Status

Indicator light

The light in the middle of the ON/OFF button repeatedly blinks depending on the PowerBox's various states as described below:

Status	Type of pulse	Description
Idle		1 flash
PduCurrentError		2 flashes
VoltageError		3 flashes
TemperatureError		4 flashes
SystemError		5 flashes
Charge mode		Continuous light disrupted by 1 flash
Discharge mode		Continuous light disrupted by 2 flashes

Digital alerts

Notifications can be seen in the « Alerts » tab of TYVA Smart Dashboard app:

- | | | | |
|---------------------|---------------------|------------------------|------------------------------|
| • Low Voltage | • Under-temperature | • PDU Lock | • Short Circuit |
| • High Voltage | • Over-temperature | • PDU Failure | • Slave Silent |
| • NTC Issue | • Under-voltage | • PDU Over-temperature | • AFE Issue |
| • Warning Bluetooth | • Over-voltage | • Charge Error | • Short Circuit on Precharge |
| • Data Log Issue | • Over-current | • Cellule Issue | |
