Electrical specifications

PowerCase	E2
Available energy /kWh	2
Output power /VAC	220
Frequency /Hz	50
16 A output	1
Maximum continuous discharge power /kW	3
DC charger input /W	300 - 1000
Recommended charge time /hours	5
Handles	2

Power outlet	E2
Input power /VAC	220
Maximum continuous charge power /kW	0.8
Maximum continuous charge current /A	15

Mechanical specifications

Dimensions

455 x 268 x
282 mm

Weight

19.8 kg

Sealing

IP54

Temperature

Operating
- 10 to + 40 °C
Charge
0 to + 40 °C

Chemistry

Li-ion NMC

Outer case

Aluminium

User interface

PowerCase

- 1 Safety vent
- 2 Type 2 power outlet
220 VAC / 16 A / 50 Hz / 3 kW max
- 3 DC charge outlet
58.8 V / 5 - 15 A
- 4 ON / OFF button
- 5 LED displays
Battery state of charge

Recharge

Outlet charge

1. Remove the protective cap from the recharge outlet.
2. Place the end of the charger in front of the PowerCase's outlet, while ensuring that the two elements correctly fit together.
3. Plug the end of the charger in the PowerCase's outlet with a slight tilt to the right. Keep rotating until you hear a click indicating the end of the charger is locked on the outlet.
4. Follow up the state of charge thanks to the LED displays on the front panel of the PowerCase.

Starting up

1

Power up / down

1. Press the ON / OFF button once.
2. The indicator light on the button is blinking twice to indicate the system's switching on. It stays lit once the PowerCase is ready for use.
3. Press the ON / OFF button for at least 3 seconds to switch off the station. Make sure not to store it while discharged.

2

Use

1. Plug your device to the PowerCase using a compatible type 2 outlet on the station's power outlet.
2. You are now powering your application thanks to the PowerCase and you can use it as you wish.
3. Unplug the cable and switch off the PowerCase to end the use.

The PowerCase can only be used in a - 10 °C to + 40 °C temperature range.
It follows a specific security protocol that cannot be bent outside this range.

Charge is impossible if you exceed the 0 to + 45 °C temperature range.
Discharge is impossible if you exceed the - 20 °C to + 60 °C temperature range.

TYVA Smart Dashboard

Download

Download our TYVA Smart Dashboard monitoring app, the genuine mobile dashboard available on Android and iOS smartphones and tablets, then connect yourself to the system with Bluetooth!

Android devices

Download the app via the Google Play Store

iOS devices

Download the app via the App Store

By downloading the TYVA Smart Dashboard app, you accept the terms and conditions of TYVA Energie's Privacy policy. Learn more: <https://tyva-energie.com/en/privacy-policy/>

Interface

The TYVA Smart Dashboard digital app allows you to supervise the global system of your portable power station made up of TYVA Energie's lithium batteries. It includes four tabs:

Homepage

Global overview of information

Properties

Temperature and voltage data

Graphs

Temperature, power, voltage and current follow up

Alerts

Warnings (blue icon) and errors (orange icon)

Status

Indicator light

The light in the middle of the ON/OFF button repeatedly blinks depending on the PowerCase's various states as described below:

Status	Type of pulse	Description
Idle		1 flash
PduCurrentError		2 flashes
VoltageError		3 flashes
TemperatureError		4 flashes
SystemError		5 flashes
Charge mode		Continuous light disrupted by 1 flash
Discharge mode		Continuous light disrupted by 2 flashes

Digital alerts

Notifications can be seen in the « Alerts » tab of TYVA Smart Dashboard app:

- | | | | |
|---------------------|---------------------|------------------------|------------------------------|
| • Low Voltage | • Under-temperature | • PDU Lock | • Short Circuit |
| • High Voltage | • Over-temperature | • PDU Failure | • Slave Silent |
| • NTC Issue | • Under-voltage | • PDU Over-temperature | • AFE Issue |
| • Warning Bluetooth | • Over-voltage | • Charge Error | • Short Circuit on Precharge |
| • Data Log Issue | • Over-current | • Cellule Issue | |
